

# GORDIUS Little Giant

## the ultimate in MIDI control

We are proud to announce a new kid in MIDI town :  
the **GORDIUS Big Little Giant foot controller (LG-X)**

An extremely versatile and customizable foot controller, which shares all the features of its smaller brother, the Little Giant, but offers an extended number of preset switches. The BIG Little Giant has no less than 13 preset switches, arranged in a 1 octave keyboard layout. Apart from that, 2 dedicated switches offer single-click-access to 2 banks of frequently reused presets or effects. And there is of course a separate pair of up-down-switches to scroll through banks or set lists.

This foot controller is the ideal choice for any musician who wants to have lots of control in a compact housing. The switch layout makes it easy to play accompanying notes or chords, but obviously the LG-X is not limited to this. Each of the switches can activate a large number of simultaneous events, controlling multiple devices at the same time.

The floor board combines many functionalities in one device: it is not only a foot controller, but can also serve as a USB MIDI interface for connection with a PC, as MIDI merge unit, as MIDI monitoring tool, ...

Although impossible to list all features on 1 sheet, here's a small overview of some important specifications:

- up to 250 banks of up to 32 presets
- up to 10 set lists containing up to 50 songs
- each preset can send an unlimited combination of different MIDI messages (PC, CC, Note, SYSEX, etc...)
- thanks to dynamic memory allocation, no strict limit on the number of MIDI messages per preset.
- Connection for up to 4 expression pedals. Highly customizable expression pedal setup, even enabling multiple simultaneous controls with 1 pedal.
- Freely downloadable PC editor

For more details on the extended feature set, feel free to download the user manual from the GORDIUS website.

*the LG-X has 13 preset switches in a 1 octave keyboard layout*

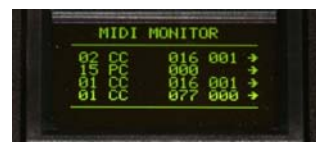

*unique switches: rugged, silent, and responsive*

*Dimmable LEDs and a high-contrast display enable use on a completely dark stage*

*The graphical display unlocks unprecedented ease of use : displaying set lists, ...*

*... or enabling more advanced features like MIDI monitoring*

*GORDIUS is a small company, founded in 2007 with the mission to bring unique solutions for the most demanding musician. It is our commitment to design highly customizable MIDI control products at a reasonable price. For more information, visit our website at <http://www.gordius.be>*
